READING SAFETY DIRECTIONS BEFORE OPENING OR USING

Cytolin®
PLANT GROWTH REGULATOR SOLUTION

ACTIVE CONSTITUENTS: 19 g/L GIBBERELLINS A4 and A7
19 g/L 6-BENZYLADENINE

Can improve fruit shape/typiness in apples.
For thinning in apples when used in combination with MaxCel Plant Growth Regulator.
For thinning of Red Delicious and Gala apples in combination with NAA.
Also for promotion of lateral growth in Red Delicious apples and cherries,
as per the Directions for Use Table.

GENERAL INSTRUCTIONS
The term “improvement of fruit shape” generally refers
to a longer apple or an increased length/diameter ratio. In certain varieties (i.e. Red Delicious) this is
known as “typiness”. DO NOT apply more than 1.5
L/ha of product when thinning Red Delicious apples.

MIXING AND APPLICATION
This liquid product mixes easily with water. For
improvement of typiness and shape, and for thinning
applications, best results are achieved using
900 to 1200 L/ha water (depending on tree size),
together with a non-ionic wetter at the recommended
rates. Add the required amount to clean spray tank
about half filled with water. Agitate while bringing the
total volume of the water to the required level. Use the
spray solution within 24 hours after mixing.

COMPATIBILITY
The addition of a non-ionic wetting agent at
recommended rates will enhance results. DO NOT
use other pesticides until spray deposits are dry.
DO NOT use another thinner unless recommended.

PROTECTION OF CROPS, NATIVE AND OTHER
NON-TARGET PLANTS
DO NOT apply under weather conditions, or from
spraying equipment, that may cause spray to drift onto
nearby susceptible plants/crops or pastures. DO NOT
apply more than 1,800 L of spray solution per ha. DO
NOT apply NAA after application of this product
except as specifically directed. This product can act
as a thinner. DO NOT apply a specific thinner until sure
of fruit set following application of this product. If
sprayed to run-off, fruit shape distortion, foliage
damage and overshining may result.

PROTECTION OF WILDLIFE, FISH AND
ENVIRONMENT
DO NOT contaminate streams, rivers or waterways
with the chemical or used containers.

STORAGE AND DISPOSAL
Keep out of reach of children. Store in the closed,
original container in a dry, cool, well-ventilated area
out of direct sunlight. Triple or preferably pressure
rinse containers before disposal. Add rinsings to spray
tanks. DO NOT dispose of undiluted chemicals on
site. If recycling, replace cap and return clean
containers to recycle or designated collection point. If
not recycling, break, crush or puncture and bury
empty containers in a local authority landfill. If no
landfill is available, bury the containers below 500 mm
in a disposal pit specifically marked and set up for this
purpose clear of waterways, desirable vegetation and
tree roots. Empty containers and product should not
be burnt.

SAFETY DIRECTIONS
Harmful if swallowed. Will irritate the eyes and skin.
Avoid contact with eyes and skin. When opening the
container and preparing product for use wear cotton
overalls button to the neck and wrist and washable
hat, elbow-length PVC gloves and face shield or
goggles. When using the prepared spray wear cotton
overalls buttonned to the neck and wrist and washable
hat and elbow-length PVC gloves.
If product in eyes, wash it out immediately with water.
After use and before eating, drinking or smoking,
wash hands, arms and face thoroughly with soap and
water. After each day’s use, wash gloves, face shield
or goggles and contaminated clothing.

FIRST AID
If poisoning occurs, contact a doctor or Poisons
Information Centre (ph 13 11 26).

MATERIAL SAFETY DATA SHEET
Additional Information is listed in the Material Safety
Data Sheet (MSDS).

IMPORTANT NOTICE
These goods are to be used only for the purpose and
as specified on the label, and are not suitable for any
other purpose. To the fullest extent permitted by law,
we do not accept or bear any liability on any basis for
any loss, damage, cost or expense, arising in any way,
directly or indirectly, in connection with the goods.

This product is not considered to be a
dangerous good under the Australian code
for the transport of dangerous goods
by road or rail.
**DIRECTIONS FOR USE:**

**RESTRANTS**
DO NOT apply if rain is likely within 6 hours.
DO NOT apply after rain until flower parts are free of droplets.
DO NOT apply when air temperature is less than 7°C or greater than 32°C.
DO NOT apply in combination with other growth regulators or pesticides.
DO NOT apply on trees that are stressed by disease or other factors.
